

# nektar id

## What is Nektar ID ?

Nektar ID is a method of extraction of oak concentrates for winemaking, designed to set up oak trials.

Nektar ID can mimic instantaneously in tasting the oak profile obtained at the end of aging with PRONEKTAR products, by directly adding the concentrates into the control wine.

## How to use Nektar ID ?

1. With the 5 ml pipette, take the volume of Nektar ID corresponding to the product and the quantity you intend to use, then pour it into the graduated cylinder of 100 ml. Use the charts of correspondence given in this document to take the volume corresponding to the intended dose.
2. Repeat step 1 with another product if the objective is to create a blend.
3. Fill the graduated cylinder up to 100 ml with the control wine you need to work on.
4. Mix and taste the obtained profile.

### STAVES NEKTAR PURE

### STAVES EXCELLENCE FOL, FOM, FOMP

### STAVES ESSENTIELLE FOM, FOMP, AOM, AOMP

### STAVES EXTREME Délicat, Complexe, Intense

Intended dose of staves (in staves/hl)	0,5	1	1,5	2	2,5	3	4	5
Volume of Nektar ID to add (in ml)	1	2	3	4	5	6	8	10

### STAVES XL FOM, FOMP

Intended dose of staves (in staves/hl)	0,5	0,75	1	1,25	1,5	1,75	2	2,5
Volume of Nektar ID to add (in ml)	2	3	4	5	6	7	8	10

### STAVES EXCLUSIVE FOL, FOM, FOMP

Intended dose of staves (in staves/hl)	0,5	0,75	1	1,25	1,5	1,75	2	2,5
Volume of Nektar ID to add (in ml)	2,5	3,75	5	6,25	7,5	8,75	10	12,5

### CHIPS

FOM, FOMP, AOM, AOMP,  
DOLCE VANILLA, DOLCE MOKA

### BLOCKS

FOL, FOM, FOMP, AO

Intended dose of chips / blocks (in g/l)	0,5	1	1,5	2	3	4	5	6
Volume of Nektar ID to add (in ml)	0,5	1	1,5	2	3	4	5	6

### NEKTAR STICKS

FOL, FOM, FOMP, AO

Number of sets of sticks per barrel of 225 liters	1	2	3	4	5	6	7	8
Volume of Nektar ID to add (in ml)	1,7	3,4	5,1	6,8	8,5	10,2	11,9	13,6
