

TESTIMONIALS

“You say Diam, I say yes!”

“Origine by Diam, the complete Diam guarantee including the consistency of oxygen permeability at bottling, an essential element for our white wines. In addition to the bio-sourced origin of its raw materials, Origine by Diam is slightly more permeable than the classic range, which is a significant advantage for Bordeaux wines intended for laying down.”

— Château Bouscaut

Méo-Camuzet

“Professionals in the wine industry and discerning wine lovers are increasingly sensitive to organoleptic deviations. Diam ensures the integrity of the wine; the only thing our customers will discover in the bottle is the result of our work and that of nature, and only that. The Origine by Diam range seems particularly well adapted to the bottling of red wines, allowing a controlled oxygen right after bottling.”

— Domaine Méo-Camuzet
